

Notes for Demonstrators 2012

Fire Marshal rule: If you are using a torch, have a small fire extinguisher within your reach.

Keep flammables stored away from torch work.

Use bungee cord or wire to attach torch tank to table legs if applicable.

Use a cloth or cover of some type to put over your work when you will be away from it. Tools and gems have a way of disappearing while you are gone.

Good idea to color code or mark your tools in a way you can identify them.

Start packing by 4:30pm on Sunday to make room for exiting dealers.

Share secrets of your trade with visitors that show an interest!

Plastic skirts are to be placed around tables but no plastic is to cover tops completely because of fire hazard.
